EDUCATION

University of Virginia

Bachelor of Science in Computer Science

Charlottesville, VA

Aug. 2024 – Dec 2027

EXPERIENCE

GuidePoint Security

Cybersecurity Intern

May 2026 – Present

Remote

- Deploying and administering enterprise security lab environments using Ludus, WireGuard, Active Directory, Windows Server, and Kali Linux to simulate real-world attack and defense scenarios
- Supporting security operations workflows involving network monitoring, system administration, threat detection, and security infrastructure management within a SOC environment

U.S. Department of the Treasury

Software Engineer Intern

May 2024 – Aug. 2024

Washington, D.C.

- Developed Python and SQL workflow automation systems that reduced multi-bureau approval turnaround time by 20%
- Improved document classification accuracy by 30% by training machine learning pipelines using scikit-learn, TF-IDF vectorization, and logistic regression models
- Built user-facing analytics dashboards and REST API integrations using JavaScript and SQL databases to support operational tracking tools for 40+ users

PROJECTS

HireReady

June 2026 – Present

- Building a full-stack AI application using React, TypeScript, FastAPI, and PostgreSQL to automate resume evaluation and job application workflows
- Implementing Retrieval-Augmented Generation (RAG), prompt engineering, ATS keyword extraction, and semantic search techniques to power personalized resume feedback and job-matching recommendations

Audia – Social Music Discovery Platform

Mar. 2026 – Present

- Developed a full-stack social music platform using React, Node.js, Express, Firebase, and Spotify APIs for music discovery and user engagement
- Built RESTful backend services, integrated third-party APIs, and managed user data while collaborating within an Agile software development team

Deep Learning Pneumonia Detection Research

June 2025 – Aug. 2025

- Developed a computer vision pipeline using CNNs, TensorFlow, and Keras to analyze 1,000+ chest X-ray images with 95% diagnostic accuracy
- Applied transfer learning across 200+ pretrained models to improve reliability, generalization, and classification performance

4me – Internship & Program Matching Platform

May 2025 – Aug. 2025

- Co-founded and developed a swipe-based internship and program matching platform using React, Flask microservices, SQL, and REST APIs
- Built authentication, recommendation, resume upload, and dashboard functionality while integrating frontend and backend services

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript

Artificial Intelligence: OpenAI, Claude, Prompt Engineering, LLMs, Retrieval-Augmented Generation, Model Context Protocol, AI Agents, TensorFlow, scikit-learn, CNNs

Frameworks & Databases: React, FastAPI, Express, Node.js, Next.js, REST APIs, PostgreSQL, MySQL

Tools: AWS, Docker, Kubernetes, Git/GitHub, JUnit, Splunk, Kali Linux, Ansible, Terraform
